

Heat Pumps

Pre-existing fuel type	Equipment type	Rebate type	Efficiency requirement	Additional requirements	Rebate amount
Oil, Propane, Natural Gas or Electric Resistance	Air Source Heat Pumps	Partial-Home	Refer to the Heat Pump Qualified Products List at MassSave.com/HPQPL	Heat Pumps must be used to supplement the pre-existing heating system during heating season. If pre-existing system is oil, propane or natural gas, integrated controls must be installed. Refer to MassSave.com/ICQPL	\$1,250 per ton
		Whole-Home		Heat Pumps must be used as the sole source of heating during heating season. Whole-home verification form must be completed and signed. Weatherization recommendations made during a Home Energy Assessment must be complete prior to installation.*	\$10,000 per home
Oil, Propane or Natural Gas	Air to Water Heat Pumps	Whole-Home			\$10,000 per home
Oil, Propane, Natural Gas or Electric Resistance	Ground Source Heat Pumps	Partial-Home	Refer to the ENERGY STAR Certified list	Heat Pumps must be used to supplement the pre-existing heating system during heating season.	\$2,000 per ton
		Whole-Home		Heat Pumps must be used as the sole source of heating during heating season. Whole-home verification form must be completed and signed. Weatherization recommendations made during a Home Energy Assessment must be complete prior to installation.*	\$15,000 per home

*Heat Pumps installed for whole-home heating and cooling that do not meet the weatherization requirement may be eligible for partial-home rebate amounts.

Condensing Boilers and Furnaces Limit 1 per account

Fuel type	Equipment type	Efficiency requirement	Standard rebate amount	Enhanced rebate amount**
Natural gas	Hot Air Furnace with ECM	≥95% AFUE	\$200	\$750
		≥97% AFUE	\$200	\$1,250
	Hot Water Boiler	≥95% AFUE	\$200	\$2,750
	Combined Condensing Furnace with ECM and On-Demand Water Heater	≥97% AFUE		\$950
Oil	Hot Air Furnace with ECM	≥86% AFUE		\$650
	Hot Air Furnace with ECM	≥95% AFUE	\$200	\$750
Propane	Hot Water Boiler	≥95% AFUE	\$200	\$2,300
	Combined Condensing Furnace with On-Demand Water Heater	≥95% AFUE		\$950
	Combined Condensing Boiler with On-Demand Water Heater	≥95% AFUE		\$1,600

**Customers replacing existing condensing furnaces or boilers are not eligible for enhanced rebates. If pursuing enhanced rebates, pre-verification is required prior to installation. Pre-verification is not required for combined condensing furnaces and boilers.

Water Heaters Limit 1 per account

Fuel type	Equipment type	Efficiency requirement	Additional requirement	Rebate amount
Oil, Propane, Natural Gas or Electric Resistance	Heat Pump Water Heater	≥3.2 UEF	Instant incentives are available for qualified heat pump water heaters purchased through a participating distributor.	\$750
Natural Gas	Storage Water Heater	≥.64 UEF Medium Draw ≥.68 UEF High Draw	-	\$100
	On-Demand Tankless Water Heater	UEF ≥.87	-	\$700
	Condensing Water Heater	UEF ≥.80	-	\$500
Propane	Indirect Water Heater	-	Connected to water boiler	\$400
	On-Demand Tankless Water Heater	UEF ≥.87	-	
Oil	Indirect Water Heater	-	Connected to water boiler	\$400

Thermostat Equipment

Product type	Efficiency requirement	Additional requirement	Rebate amount
Programmable Thermostat	-	Limit 3 per account	\$25
Smart Thermostat	ENERGY STAR® certified	Limit 3 per account	\$100
Integrated Control	Refer to MassSave.com/ICQPL	Limit 3 per account. Add on to an existing air source heat pump.	\$500
